

# ELTER

electrotechnics  
of technological  
processes

**COMPANY  
PROFILE**

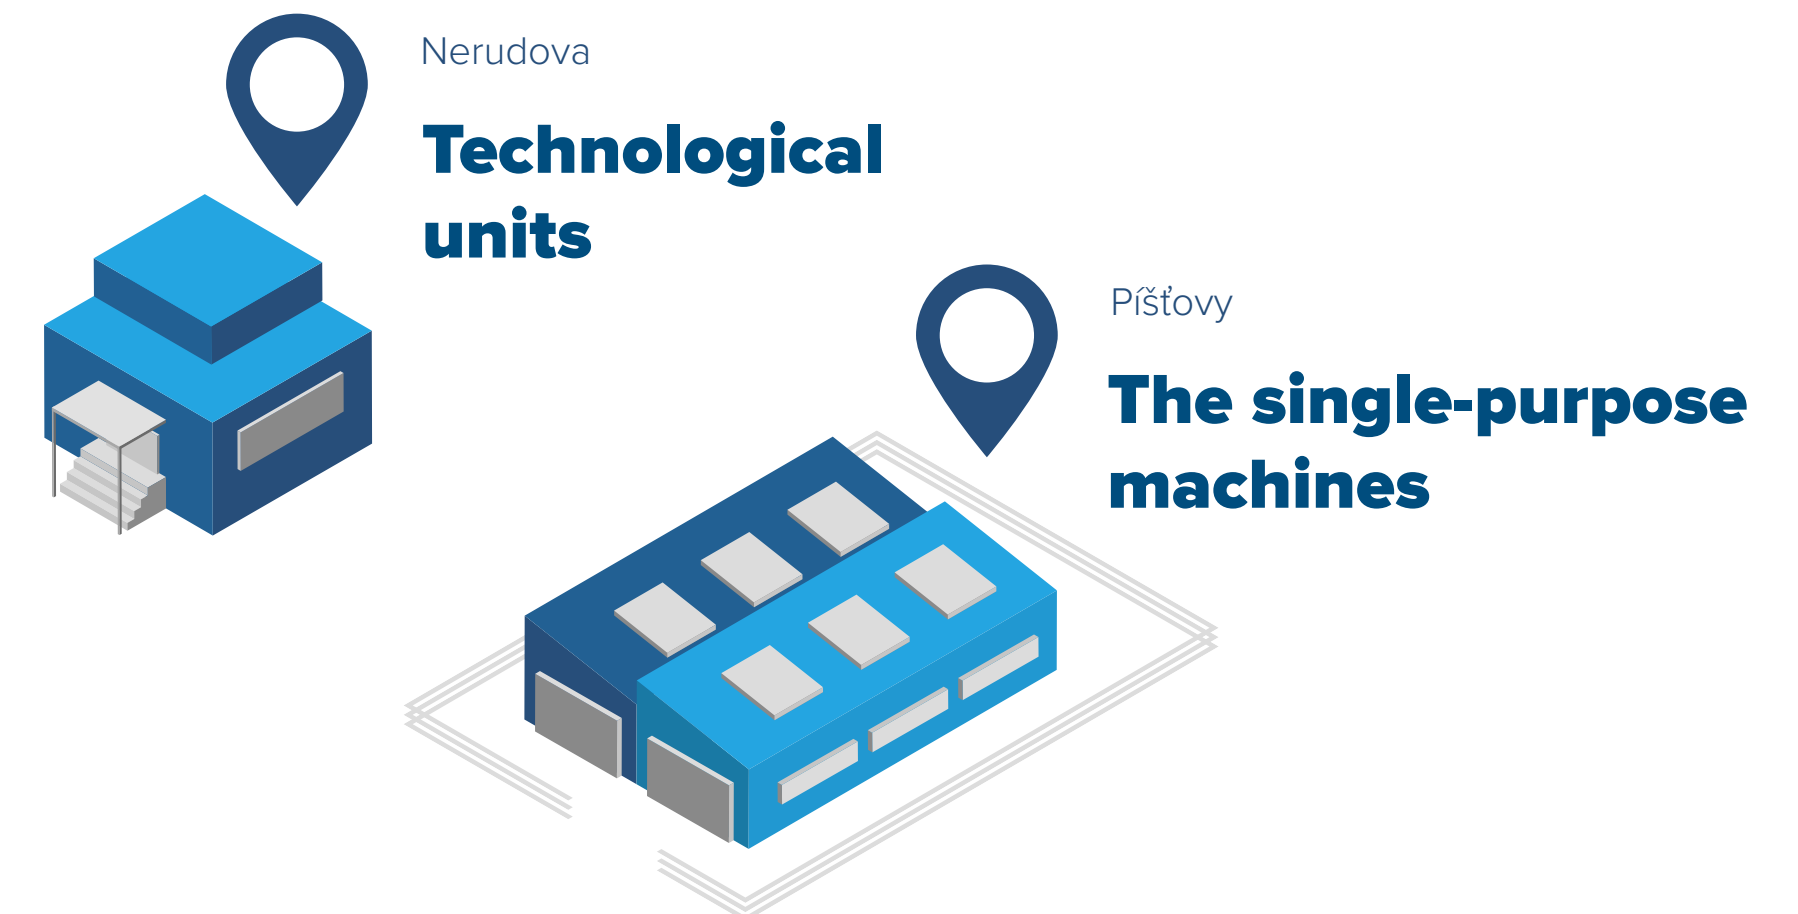

# Company introduction

We have been industry integrator on the market since 2006. During that time, we have transformed ourselves from a small family business into a company whose stability is evidenced not only by its growth, but mainly by many satisfied Czech and foreign customers. At the same time, we approach each client individually and their satisfaction is crucial for us.

## ELTEP IS DIVIDED INTO 2 CENTERS

### The alpha and omega of our work is:

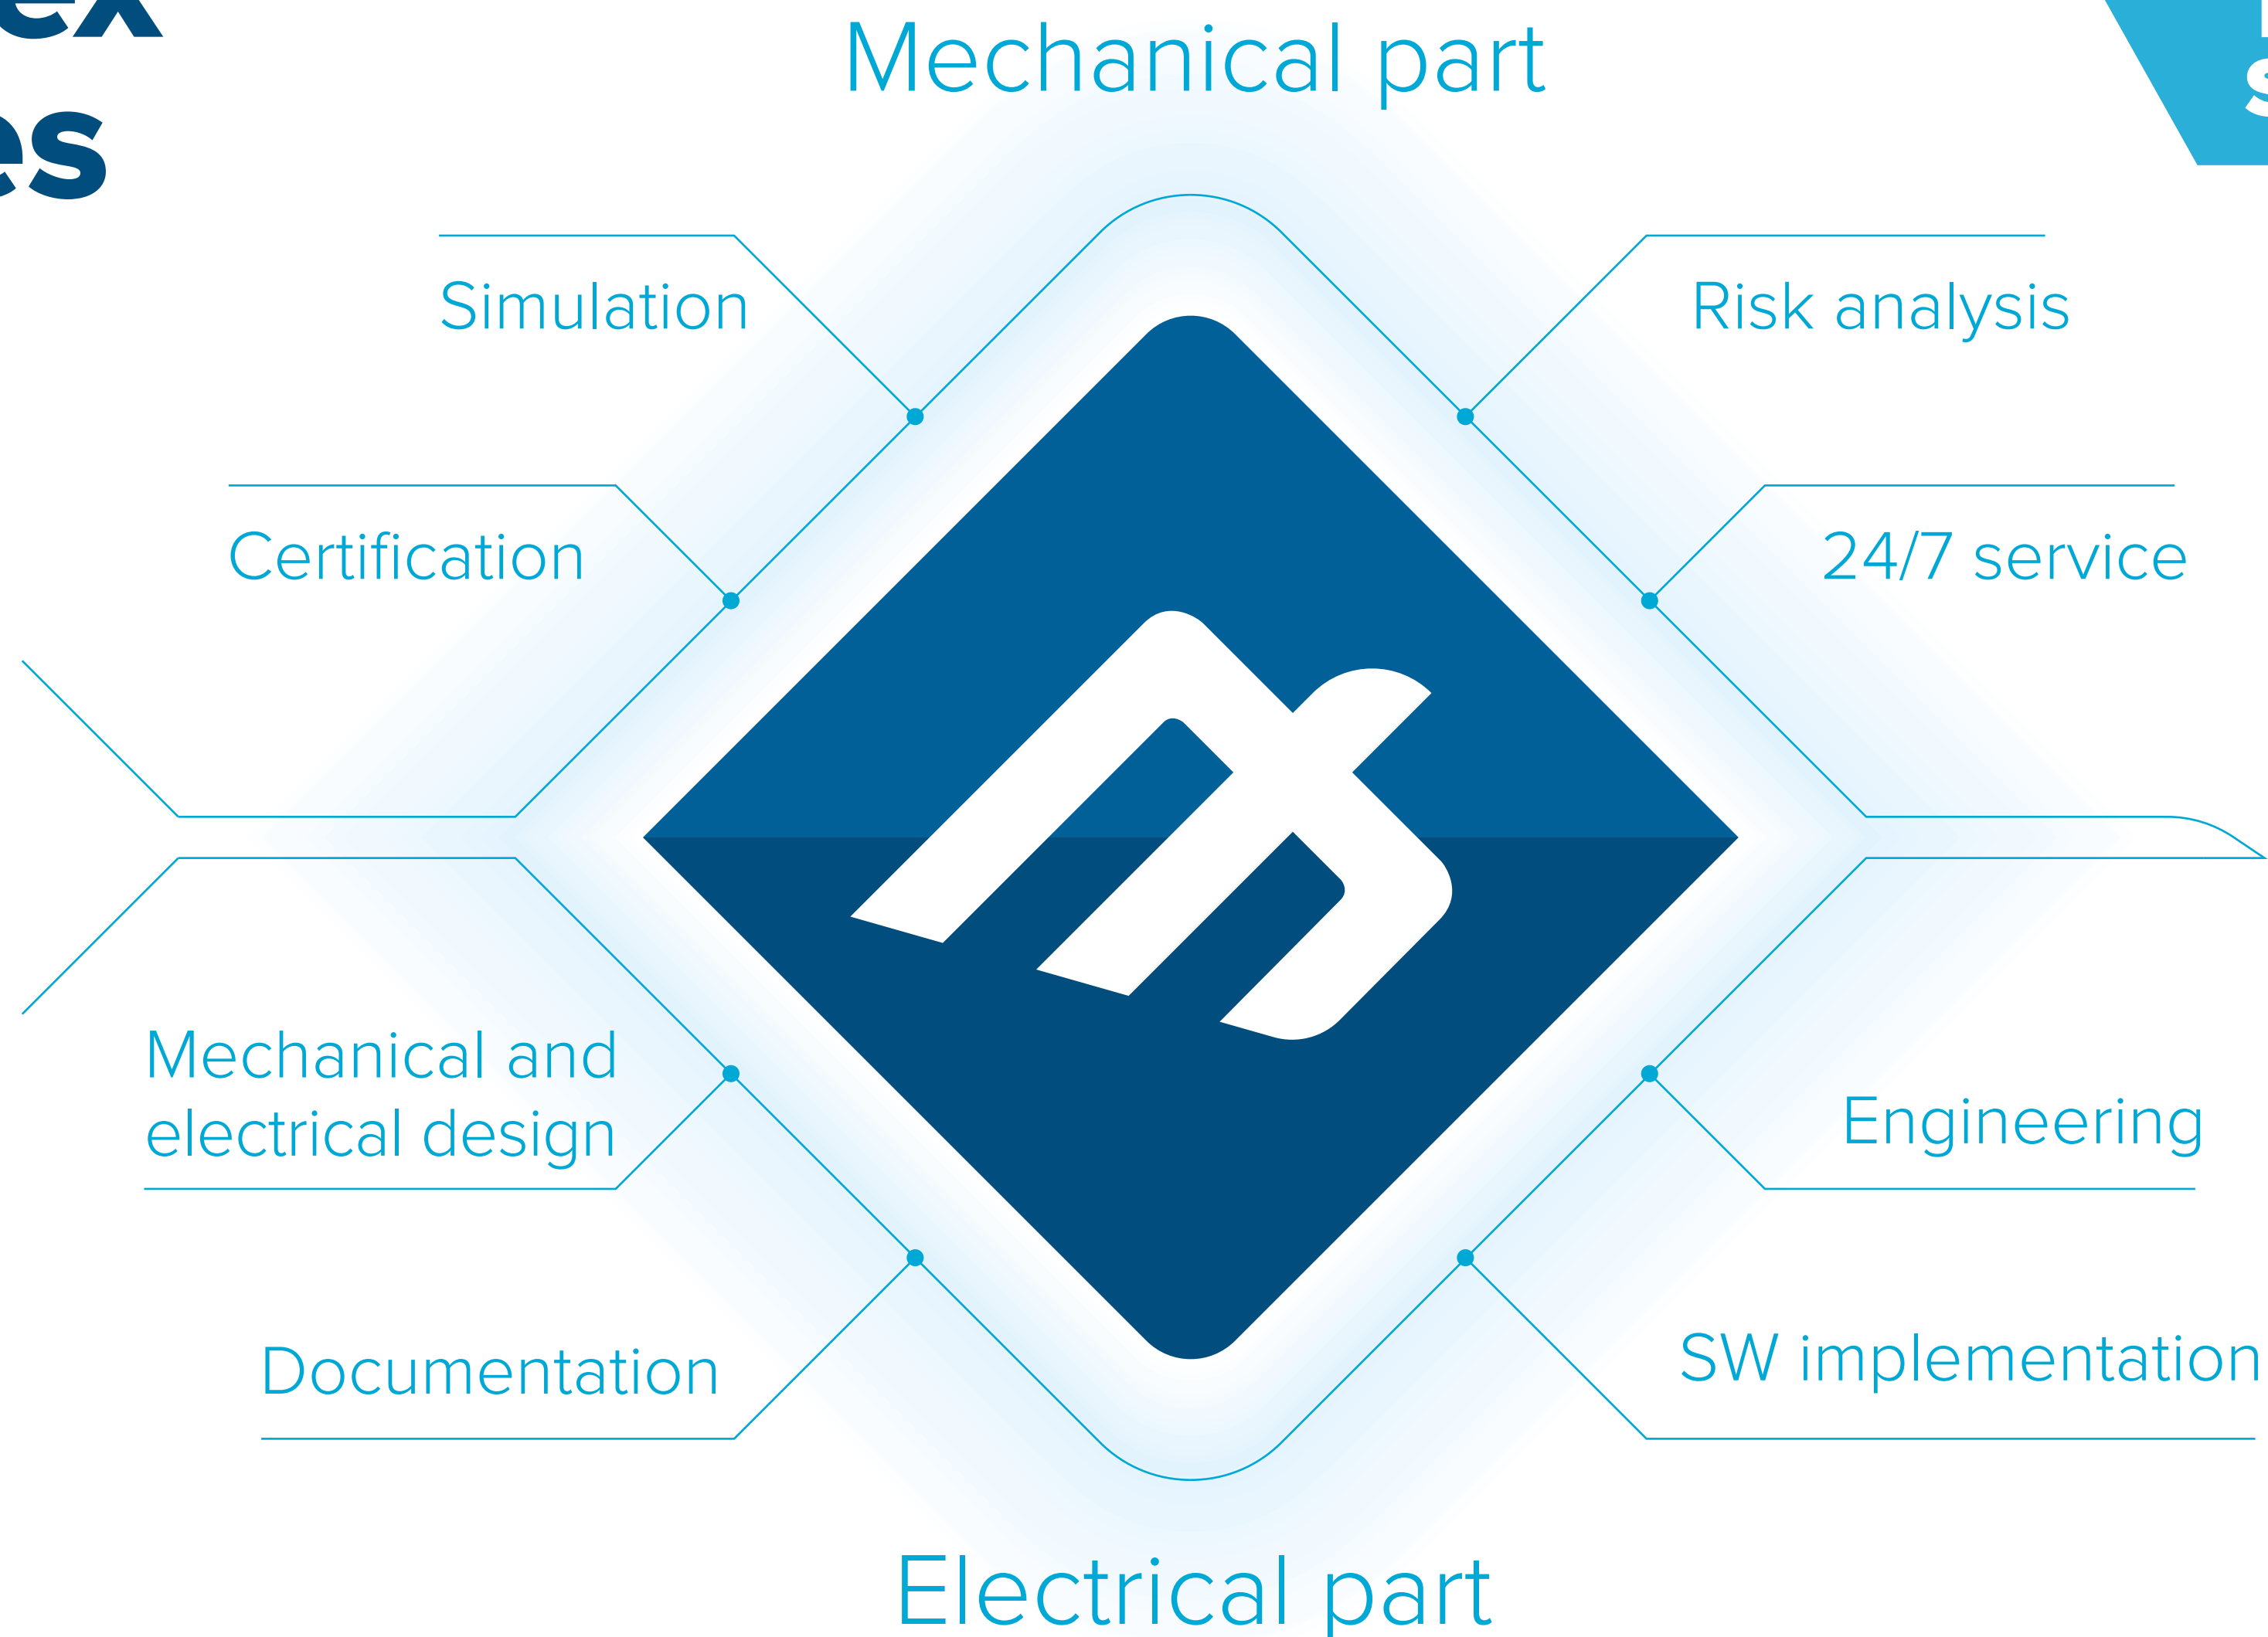

- industrial automation
- process control
- robotics
- complex development of single-purpose machines.

**The current trend is the implementation of Industry 4.0 principles, such as digitisation of production, data visualization etc.**

# Complex services

**COMPREHENSIVE  
TURNKEY  
SOLUTION**

**CUSTOMER  
NEEDS**

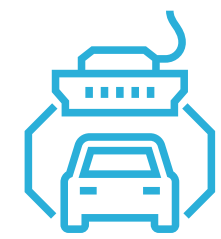

**SUCCESSFUL  
IMPLEMENTATION  
=  
SATISFIED  
CUSTOMER**

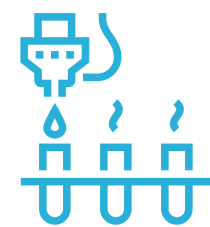

# Complex services

**TWO  
CENTERS  
ONE TEAM**

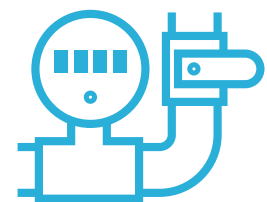

## TECHNOLOGICAL UNITS

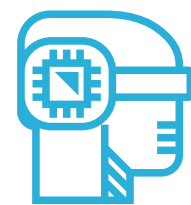

Painting

Material  
transport

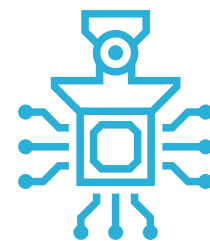

I&C, instrument  
and control

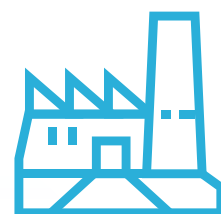

Central  
management

Energy  
monitoring

Power supply  
systems

Production  
processes

Extruders

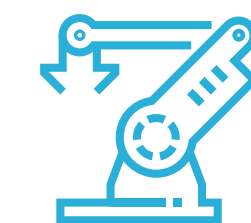

## THE SINGLE-PURPOSE MACHINES

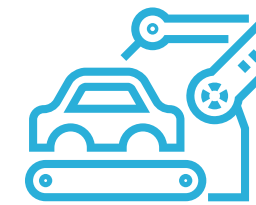

Testers

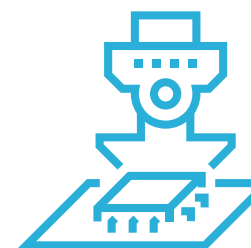

Palletization

Robotic  
workplaces

Assembly  
lines

Single-purpose  
machines

Vision  
systems

Conveyor  
systems

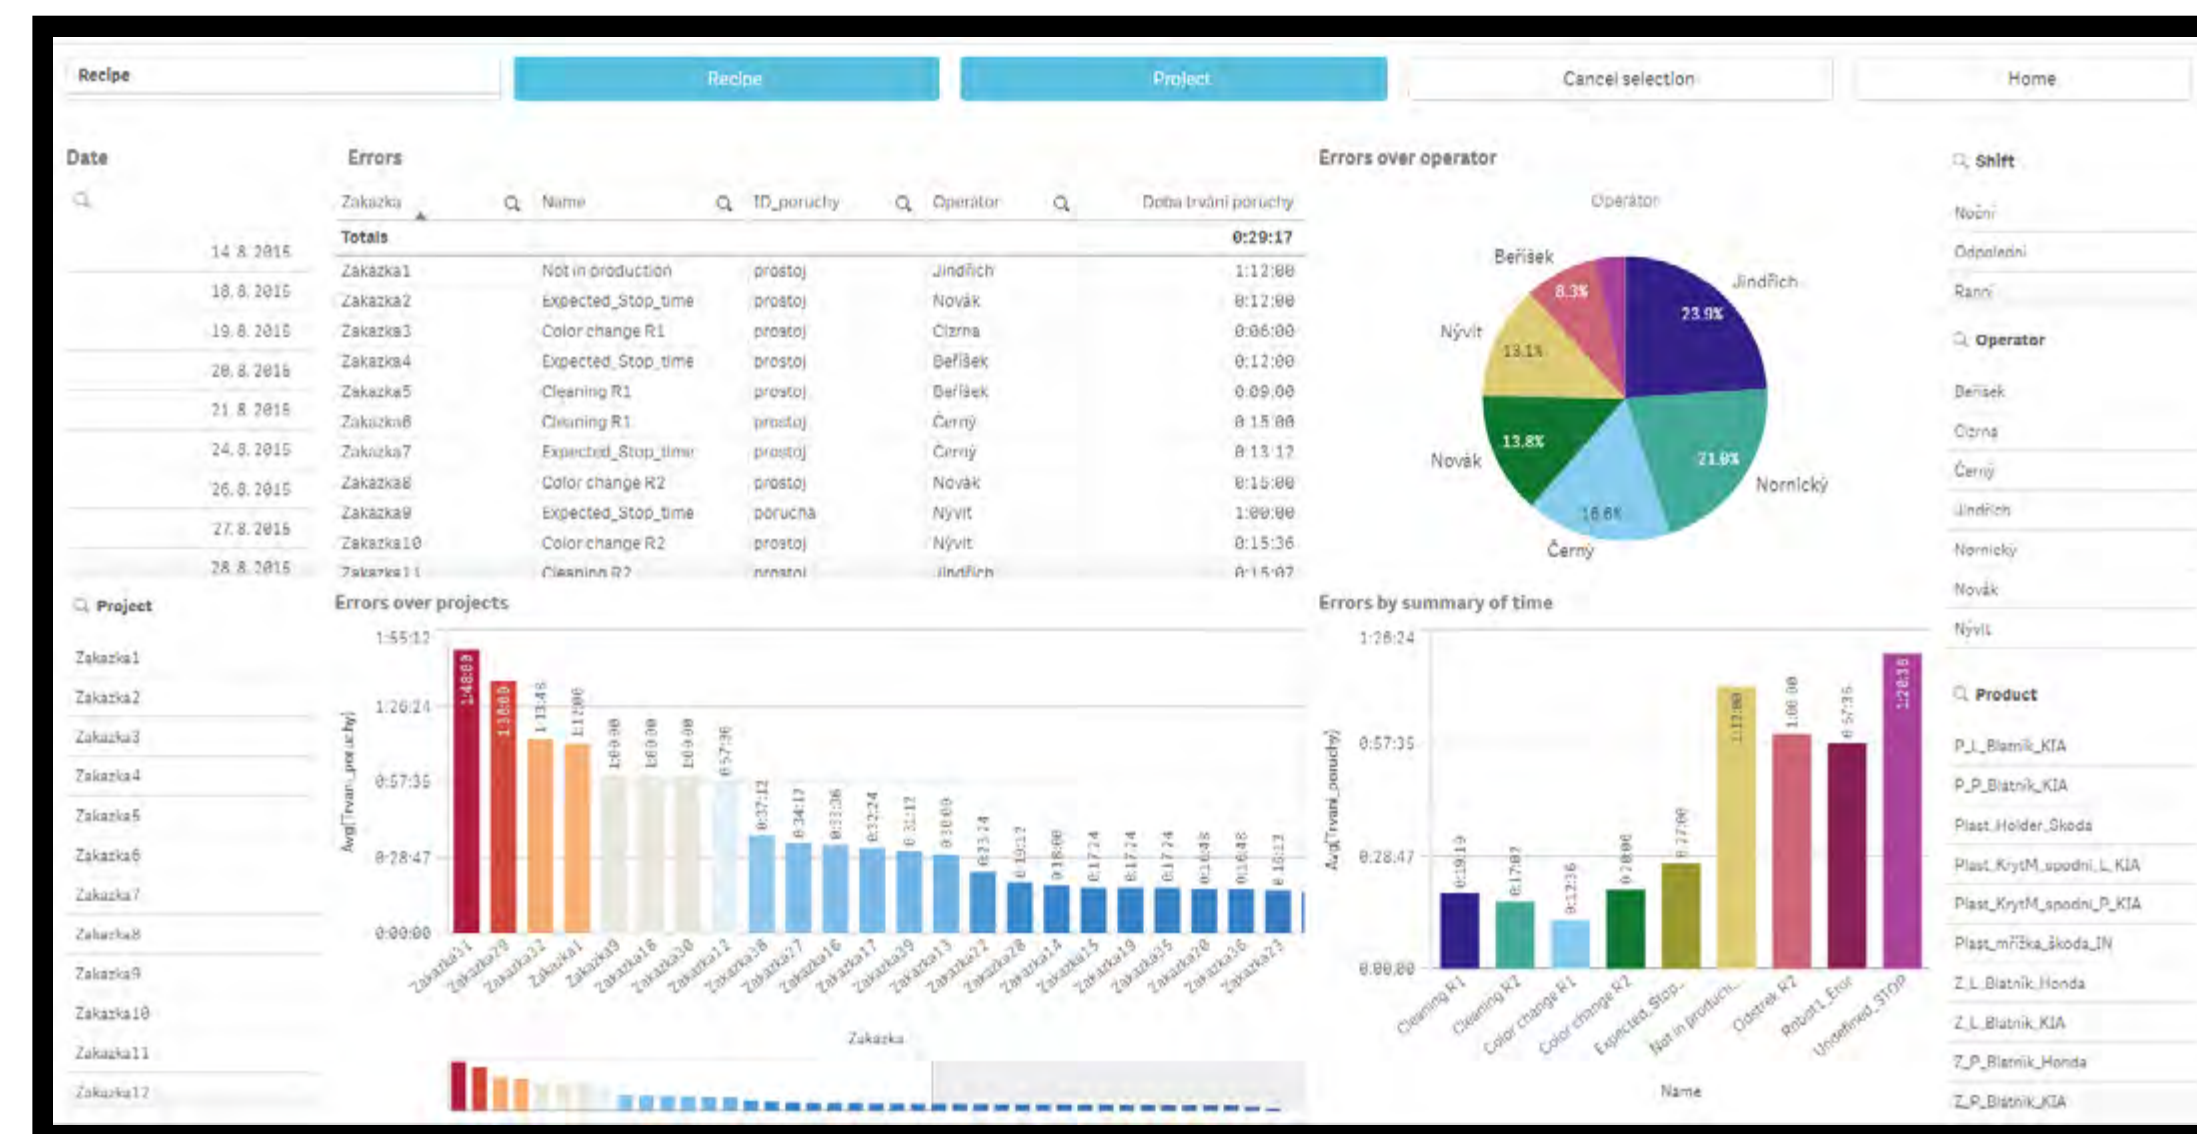

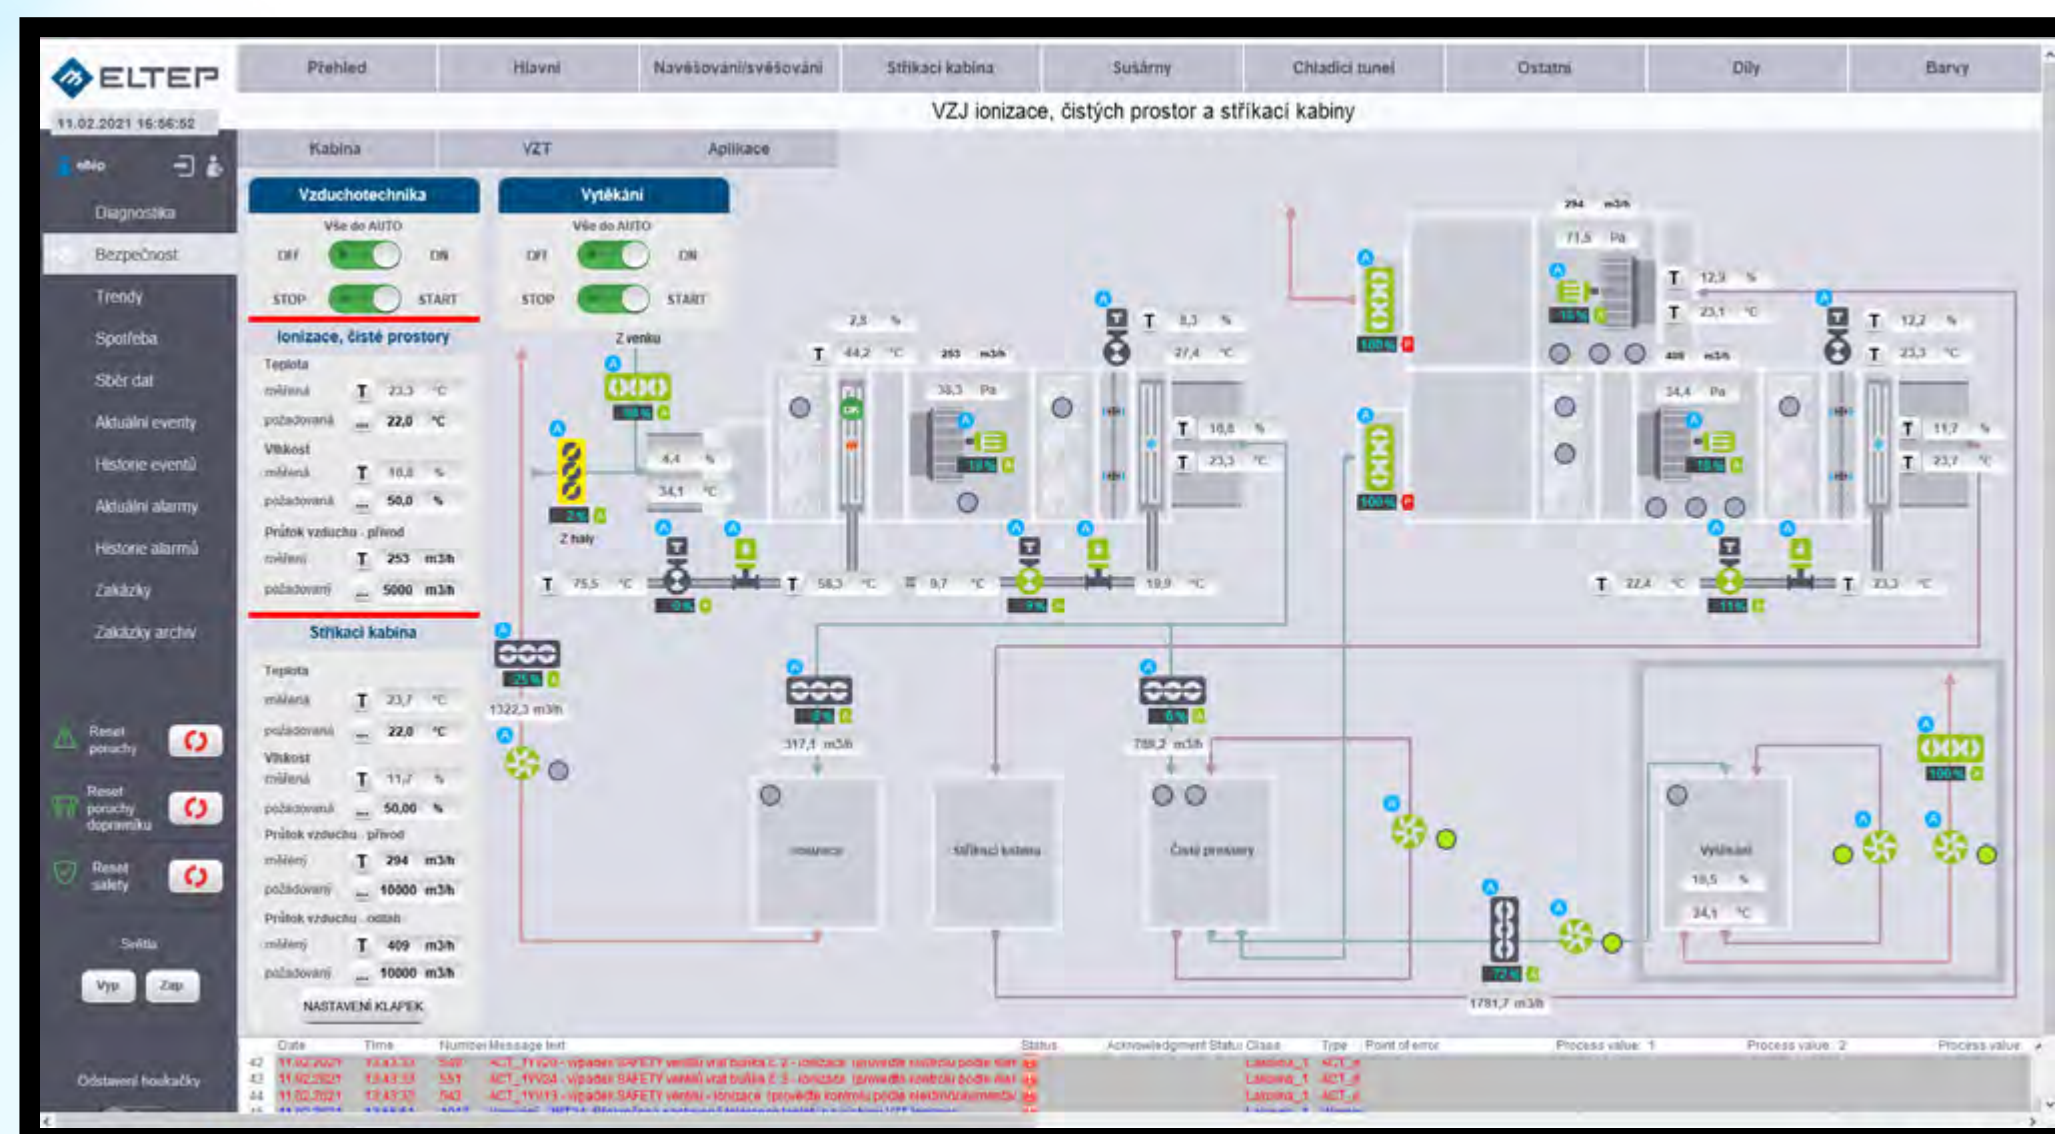

Manipulators

**24/7 SERVICE**

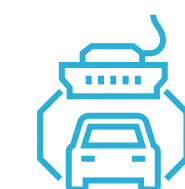

# Technological units

## PROCESS MANAGEMENT PLC & SCADA

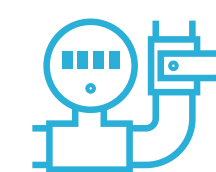

PLC SCADA IOT ERP MES

We integrate systems and provide their network connections

Painting  
lines

I&C,  
instrument  
and control

Energy  
monitoring

Material  
transport

P&F  
conveyors

Extruders

# Single-purpose machines

**WHAT A MACHINE,  
THE ORIGINAL  
FROM ELTEP**

## **Turntables**

- ◆ Standard/EX design
- ◆ High accuracy and speed
- ◆ Complex rotation systems

## **Single-purpose machines**

- ◆ High speed machines
- ◆ Complex solution
- ◆ Modernisation of existing facilities

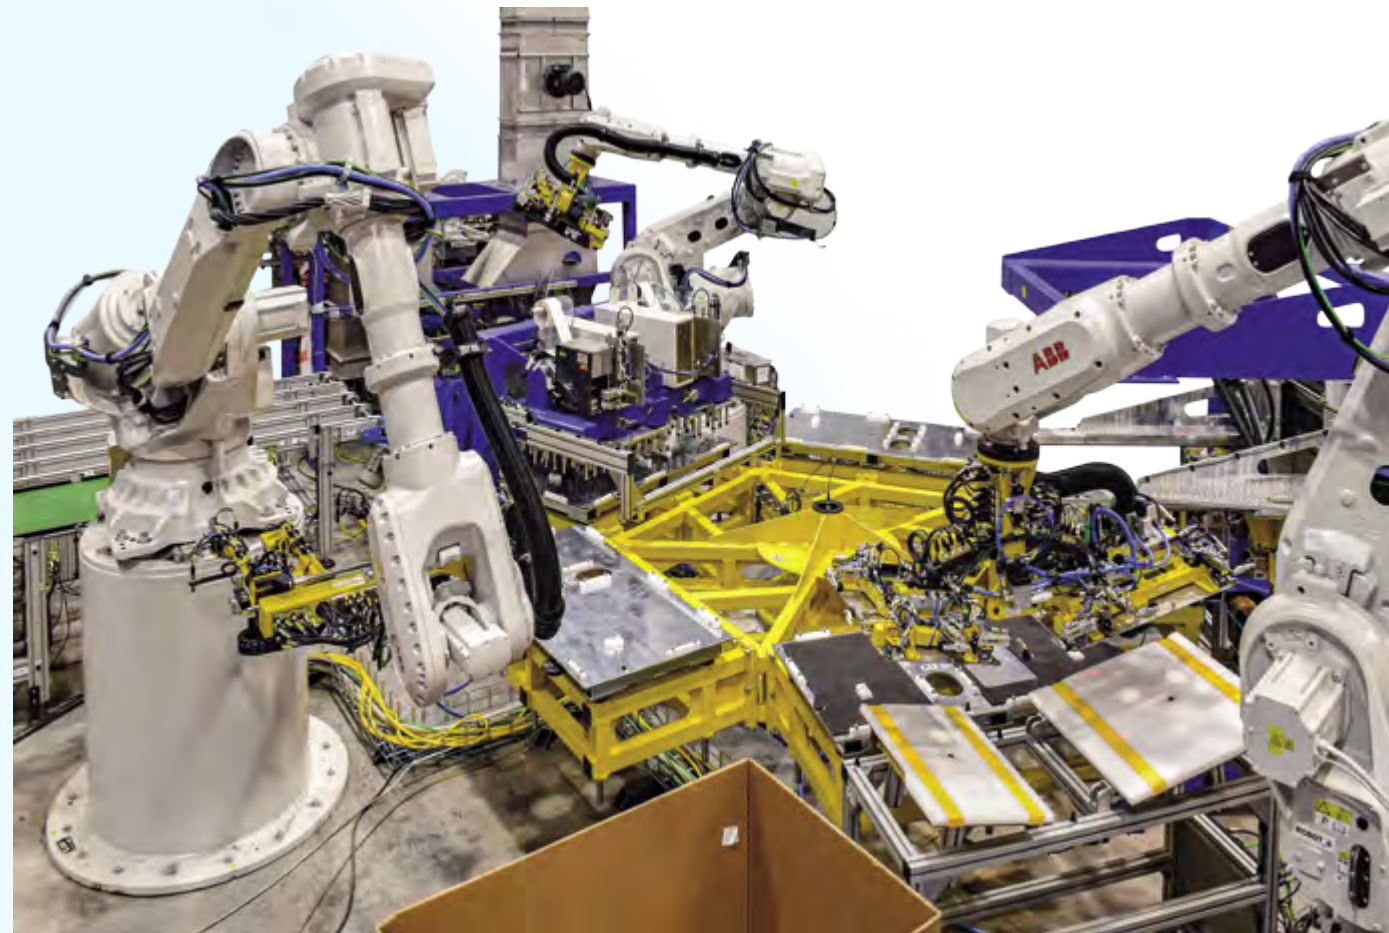

## **Testers**

- ◆ Functional tests
- ◆ Presence of a components
- ◆ Stress and performance tests

# Single-purpose machines

## Robotic workplace

- ◆ Process design and simulation
- ◆ Integration with existing machines
- ◆ Automatic lines

## Assembly workplace

- ◆ Manual
- ◆ Semi-automatic
- ◆ Fully automatic

## Vision systems

- ◆ Quality control
- ◆ Measurement of defined parameters
- ◆ Bin picking
